Challenges and Opportunities of Circuits and Systems on Internet of Things

This seminar aims to discuss the technical trends and challenges of circuits and systems on Internet of Things.

31 October 2016 at 11:00 am at KEDEA

Speaker

Dr. Yen – Kuang Chen

Principal Engineer at Intel Corporation

His research areas span from emerging applications that can utilize the true potential of the internet of things to computer architecture that can embrace emerging applications. He has 50+ US patents, 20+ pending patent applications, and 85+ technical publications.

Organisers

Laboratory of Electronics (Department of Electrical and Computing Engineering)
Laboratory of Electronics (Department of Physics)

Sponsored by

CAS

SCHOOL OF ELECTRICAL & COMPUTER ENGINEERING
ARISTOTLE UNIVERSITY OF THESSALONIKI
